

## Two Conferences: One Powerful Year of Professional Learning.

Our conferences support schools at the start of the journey and at the point of change, giving leaders and teachers confidence, clarity and practical strategies they can use immediately.

### Autumn Conference

#### Best Start in Life – Strong Foundations for Every Child

*Why it matters:* the early years set the trajectory for children's learning, confidence and wellbeing. This conference focuses on getting maths right from the start.

### Summer Conference

#### Preparing for the New Curriculum – Ready, Confident, Coherent

*Why it matters:* curriculum change in maths can feel daunting. This conference helps schools prepare confidently, rather than react later.

## More Than a Conference: Ongoing Support

Our conference offer is part of a wider, joined-up professional development programme, designed to support schools before, during and after key points of learning and change. Alongside the autumn and summer conferences, schools engage in Work Groups that provide sustained, practical support throughout the year.

**Work Groups ensure learning doesn't stop when the conference ends.**

Work Groups bring together teachers and leaders from different schools to develop effective classroom practice over time, supported by Primary Mastery Specialists.

They move beyond one-off training, focusing instead on:

- Implementation in real classrooms
- Professional dialogue and reflection
  - Collaborative problem-solving
  - Sustained school improvement

A strong offer, combining:

- Two high-impact conferences and
- Ongoing Work Group support

Schools receive a full year of professional development that supports staff, strengthens curriculum thinking and improves outcomes for pupils.

Funded by the Department for Education, this programme is available at **no cost** to participating schools.
